Electric capacitive type proximity sensor

Features

- •Able to detect iron, metal, plastic, water, stone, wood etc
- •Long life cycle and High reliability
- •Built-in protection circuit of reverse power polarity, surge
- •Easy to adjust of the sensing distance with built-in sensitivity adjuster
- ullet Available to check the status of operation by Red LED indicator
- •Easy to control of level and position

A Please read "Caution for your safety" in operation manual before using.

◎DC 3-wire type

AC 2-wire typeAppearancesModelM18CR18-8AOM18CR18-8ACM30CR30-15AOCR30-15AC

▶ * Mark is optional.

Specifications

Model	CR18-8DN CR18-8DP CR18-8DN2	CR30-15DN CR30-15DP CR30-15DN2	CR18-8AO CR18-8AC	CR30-15AO CR30-15AC	
Sensing distance	8mm ±10%	15mm ±10%	8mm ±10%	15mm ±10%	
Hysteresis	Max. 20% of sensing distance				
Standard sensing target		$50 \times 50 \times 1$	mm(Iron)		
Setting distance	0 ~ 5.6mm	0 ~ 10.5mm	0 ~ 5.6mm	0 ~ 10.5mm	
Power supply (Operating voltage)	12-24VDC (10-30VDC)		100-240VAC (85-264VAC)		
Current consumption	Max. 15mA				
Leakage consumption			Max. 2.2mA		
Response frequency(*1)	50Hz		20Hz		
Residual voltage	Max. 1.5V		Max. 20V		
Affection by Temp.	$\pm 10\%$ Max. for sensing distance at +20 °C within temperature range of -25 \sim +70 °C				
Control output	Max. 200mA		Max. 5 ~ 200mA		
Insulation resistance	Min. 50MΩ (at 500VDC)				
Dielectric strength	1500VAC 50/60Hz for 1 minute				
Vibration	1mm amplitude at frequency of 10 ~ 55Hz in each of X, Y, Z directions for 2 hours			ons for 2 hours	
Shock	500m/s ² (50G) in X, Y, Z direction for 3 times				
Indicator	Operation indicator (Red LED)				
Ambient temperature	−25 ~ +70°C (at non-freezing status)				
Storage temperature	-30 ~ +80℃ (at non-freezing status)				
Ambient humidity	35 ~ 95%RH				
Protection circuit	Surge protection circuit, Reverse polarity protection		Surge protection circuit		
Protection	IP66(IEC standard)	IP65(IEC standard)	IP66(IEC standard)	IP65(IEC standard)	
Cable	<i>∮</i> 4×3P, 2m		<i>∮</i> 4×2P, 2m		
Unit weight	Approx. 72g	Approx. 212g	Approx. 63g	Approx. 220g	

*(*1) The response frequency is the average value. The standard sensing target is used and the width is set as 2 times of the standard sensing target, 1/2 of the sensing distance for the distance.

Sensitivity adjustment

Please turn potentionmeter VR and set sensitivity as below procedure.

 Without a sensing object, turn the potentionmeter VR to the right and stop at the proximity sensor is ON(OFF).

3 If the difference of the number of potentionmeter VR revolution between the ON(OFF) point and the OFF(ON) point is more than 1.5 turns, the sensing operation will be stable.

Put the object in right sensing position, turn the potentionmeter VR to the left and stop at the proximity sensor is OFF(ON).

4 If it is set in sensitivity adjustment position of potentionmeter VR at center between 1 and 2, sensitivity setting will be completed.

Counter

- *When there is distance fluctuation between proximity sensor and the target, please adjust **2** at the farthest distance from this unit.
- Turning potentionmeter toward clockwise, it will be Max. and turning toward counter clockwise, it will be Min. the number of adjustment should be 15±3 revolution and if it is turned to the right or left excessively, it will not stop, but it idles without breakdown.
- ※ () is for Normal Close type.

Grounding

The sensing distance will be changed by grounding status of capacitive proximity sensor and the target $[50 \times 50 \times 1 \text{mm}(\text{Iron})]$. Please check the material when installing it on panel.

Mutual-interference & Influence by surrounding metals

When several proximity sensors are mounted closely, malfunction of sensor may be caused due to mutual interference. Therefore, be sure to provide a minimum distance between the two sensors, as below charts.

Parallel

Model Item	CR18	CR30
А	48	90
В	54	90

(Unit:mm)

(Unit:mm)

When sensors are mounted on metallic panel, you must prevent the sensors from being affected by any metallic object except target. Therefore, provide minimum distance as shown.

Model Item	CR18	CR30
l	20	10
ød	54	90
m	24	45
n	54	90

Materials

⊘Materials of sensing targets

Sensing distance may be different by electrical characteristic of sensing target(Conductivity, Non dielectric constant) and status of water absorption, size etc.

©Effect by high frequency electrical field

It may cause malfunction by machinery which generate high frequency of electrical field such as a washing machine etc.

OSurrounding environment

There is water or oil on surface of sensing part, it may cause malfunction. If the bottle for detecting of level is coated by oil etc., it may cause malfunction. Especially, 15mm type has high sensitivity for induced objects, please be careful of waterdrops.

©0il

Do not let the oil or oil liquid is flowed into the sensor, the case is made by plastic.
