Fusible Resistors - FRN, FKN, FSQ Series

Fusible Resistor Features Best of Both Worlds

▶ Preview

Designers of small power supplies and battery chargers for consumer products can benefit from a fusible resistor with superior lightning strike and pulse abilities in a cost effective package.

Token Electronics offers a combination resistor/fuses series of metal/carbon film fusible resistor (FRN), wirewound fusible resistor (FKN) and cement encased fusible resistors (FSQ). Token offers fusible FRN series a low-cost alternative to traditional solutions for applications that require surge protection.

The robust cement-coated wire-wound FSQ resistors and wirewound fusible FKN resistors are ideal for power supply applications across the telecomms, military and industrial markets which require a replacement for carbon composition resistors within the circuit design.

As part of the Token input protection range, this resistor provides a key fusible solution and is completely customisable to suit the individual application design requirements. Key design engineers with a need for a robust resistor, will find the FRN, FKN and FSQ series are a multifaceted product, providing comparable pulse performance with added fusing capabilities.

Our custom solutions are designed to address your need for technical and economic success in a timely manner. Contact us with your specific needs.

▶ Features

- Low Cost
- Low Noise
- Reduced numbers of parts used in circuits
- Products with Pb-free Terminations and RoHS compliant

▶ Applications

- Telecommunications
- Household appliances
- Inrush Pulse protection
- Lightning strike protection
- Input protection for small power supplies and battery chargers

▶ Metal Film Fusible (FRN) - Specifications & Dimensions (Unit: mm)

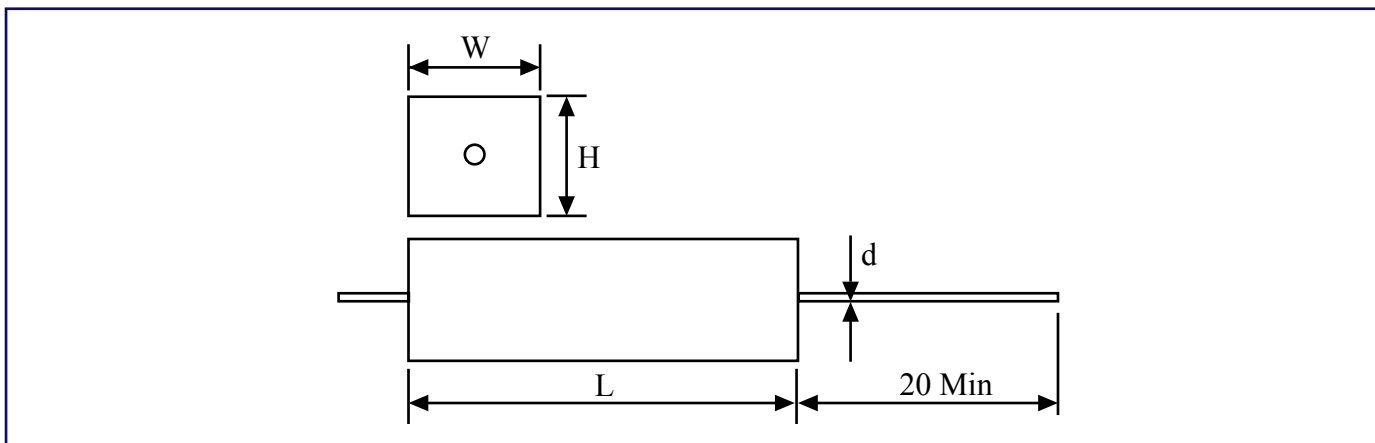

Type	Rated Wattage	Dimension (mm)						Resistance Range	Dielectric Withstanding Voltage
		$L \pm 1.5$	$D \pm 1$	$H \pm 0.5$	$W \pm 0.5$	$H \pm 3$	$d \pm 0.05$		
FRN	1/4W	6	2.3			26	0.40~0.50	0.22Ω~100KΩ	300V
	1/2W	6	2.3			26	0.50~0.55	0.22Ω~100KΩ	300V
	1W	9	3.0			26	0.50~0.55	0.22Ω~100KΩ	350V
	2W	11	4.0			26	0.75~0.80	0.3Ω~100KΩ	500V
	3W	15	5.0			35	0.75~0.80	0.3Ω~100KΩ	500V

FRN, FKN, FSQ - Application Notes

For fusible resistors, unlike fuses, fusing performance is given in terms of power rather than current. The power can be calculated:

$$\text{Power} = \text{Amperes}^2 \times \text{Ohms}$$

Fusing Device Application Notes

- When using, it shall be made sure that the overload conditions at unusual moments lie within the fusing territory.
- Consult with Token in advance when overloaded higher than the rated voltage under an ordinary situation since such an overload may store up damages on resistors.
- Use at the maximum open-circuit voltage or lower as an arc phenomenon may arise when high voltage is applied again after fusing by an over current.
- Consult with us for the maximum open- circuit voltage because it varies with applications.

How to Order
