Digital transistors (built-in resistors) DTC114EE / DTC114EUA / DTC114EKA DTC114ECA / DTC114ESA

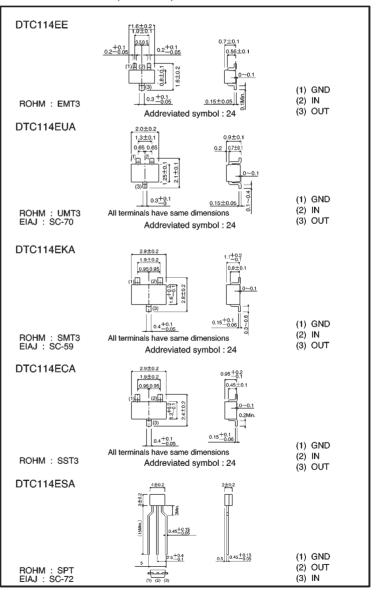

Features

- Built-in bias resistors enable the configuration of an inverter circuit without connecting external input resistors (see equivalent circuit).
- The bias resistors consist of thinfilm resistors with complete isolation to allow negative biasing of the input. They also have the advantage of almost completely eliminating parasitic effects.
- Only the on/off conditions need to be set for operation, making device design easy.
- ●Structure NPN digital transistor (with built-in resistors)
